Top tip  
The back of many wheelchairs are soft. If you secure the shoulder straps over the back and add a lot of weight to the bag, it can damage the top of the seat. We would recommend, where possible, you distribute the weight using the straps.

What it fits  
The rucksacks will fit a wide range of wheelchairs, scooters and powerchairs. If the scooter has no headrest and a particularly sloping seat, the shoulder straps may slip down. A bridging strap has been included to help reduce the risk of slippage.

## SCOOTER CANOPY

After much research and development, we are pleased to introduce our first [Simplantex scooter canopy](#): a universal scooter canopy frame with a bespoke bracket fitting, offering the fit that you require at an affordable price.

## NEW PRODUCT

[Simplantex scooter canopy](#)

Two crutch/walking stick holders at the interior rear of the canopy

## What it fits

The Simplantex scooter canopy is available to fit a wide range of scooter brands including Shoprider, Pride and Kymco.

An extensive list of suitable scooters and the relevant canopy code can be obtained from your local dealer.

We recommend that you discuss fitting with your local dealer. The frame is relatively simple to assemble but the brackets for the scooter underside will require some assistance. Fitting instructions are supplied for each individual model.

## Taking care when driving

Rain can reduce your visibility. In severe weather conditions please reduce speed. A cloth can reduce some of the excess water or condensation on the PVC.

At night some drivers can experience problems with light reflecting back off the front screen from their headlights. Make sure that adjustable headlights are angled down and drive with the tiller angled further forward.

Remember that if you get off your scooter in strong winds, your body weight will no longer be keeping the scooter on the ground. We recommend that you leave your scooter in a sheltered place.

In very strong winds, we recommend unzipping a door to allow the wind to vent through. In severe conditions open both doors and secure them for maximum venting.

FOOT CARE  
Socks

What makes our socks unique?

These socks are specifically designed for problem and sensitive feet. The unique ridgeless seams and engineered cross stretch allow for non-binding of the foot and calf.

Seam free

Traditional seamed socks can irritate or chafe leading to discomfort or pain. Our socks are hand linked at the toe resulting in a perfectly seamless join greatly reducing the risk of pressure sores and rubbing.

Elastic free

Traditional socks have elasticated tops to hold them up, which can restrict circulation. This is worrying if you suffer from poor circulation, sensitive legs or you are prone to swelling. Our socks contain no elastic whatsoever!

How quickly will my order be dispatched?

If an order is received before 2pm Monday to Thursday it will be dispatched for next day delivery. Orders received before 12pm on a Friday will be dispatched for delivery on Monday. This is based on the presumption that items are in stock.

Courier charges are £5.95 for orders of less than five items, five or more items are carriage paid.

Do you offer product customisation?

If you are interested in customising your bags or covers with your company name and/or logo please do not hesitate to contact us on 0870 870 7140 and we will be happy to discuss this matter.

**Can you dispatch items directly to my customers?** Yes. Simply supply their details as the delivery address and we will send the items direct. Please note that a £5.95 carriage charge will be incurred.

What happens if an item is out of stock?

It is rare for us to be out of stock but if for some reason we are we will inform you immediately and endeavour to find you a suitable alternative and if that is not possible you will be provided with a new delivery date.

Are your products waterproof?

The entire All weather range in the Simplantex brochure and on our website is 100% waterproof, not only is our fabric waterproof but all of our products are seam sealed please be aware of other companies that state 100% waterproof fabric, this is a marketing ploy to trick you in to believing the garment is waterproof. Quite simply if the product is not seam sealed it is not waterproof!
